
Unable to centralize images

Posted by cheng - 2011/06/09 14:12

Hi,

i am new to joomla 1.6, read some review about Ari Image Slider and decided to try.

I position the image slider in the middle of the page, but unfortunately the photos are aligned to right side.

How can i centralize it?
my website is www.thefatwombat.com.

Thanks

Hello,

Open module settings page and set correct values for "Width" and "Height" parameters. For example set "Width" to 980 and "Height" to 354 value.

Regards,
ARI Soft

Hi!

Thanks for your quick reply!

I manage to get it centralized. However i observe that the margin at the right and at the left is different.

The spacing (white space) at the left is bigger than on the right.

Can you help?

Thanks

The padding is defined in site template. If you want to avoid it, add the next CSS rule to site template CSS file or to "CSS Styles" parameter in module settings:

```
body #rt-showcase .rt-block
{
padding: 0;
}
```
