
a false message and can't get center of page

Posted by hishiro - 2011/06/10 06:57

I'd install image slider module on my site, but every time accessing it's show the false message, also the slider not centered. What's wrong? http://www.ari-soft.com/images/fbfiles/files/My_Pictures.zip

Hello,

Provide link to page where we can see the problem. It seems "false" message is shown by another extension, "ARI Image Slider" doesn't contain code which shows this message.

Regards,
ARI Soft

About centering, if you mean small left padding, it is defined in sit template CSS file. Add the next CSS rule that remove it:

```
#slides
{
padding: 0;
}
```

About "false" message, we can't reproduce the problem. We have tried to reproduce it in FireFox, Google Chrome and IE browsers.

solved by re-installing joomla..
is there i can change dropshadow color to white maybe?

Use the next CSS rule:

```
.ari-image-slider-wrapper DIV.nivoSlider
{
-moz-box-shadow: 0 0 5px red;
-webkit-box-shadow: 0 0 5px red;
box-shadow: 0 0 5px red;
}
```
