Bullets displaced after update

Posted by manolox - 2011/06/24 18:18

_____

My Image Slider was working properly except in Internet Explorer 9. So I updated to the newest version and now my bullets/controls have moved to the bottom/right portion of my page, outside of view. They also are vertical instead of horizontal and lost the spacing.

thank you

_____

Hello,

Provide link to page where we can see the problem.

Regards,
ARI Soft

_____

The link is http://_____
Scroll to the right and you will see the bullets in the center/right of the page. Completely displaced and vertical.

Thank you

_____

This problem with site template. It contains custom CSS rules for "ARI Image Slider" which is not compatible with original version of the extension. You can try to add the next CSS rule:

```
div.nivo-controlNav {
    left: 240px;
    position: relative;
    top: -60px;
}
```
