IE9 Problem -

Posted by s6carlo - 2011/06/30 10:09

_____

First of all thank you for the great free joomla module!
I am trying it in a website, but I have some problem with internet explorer 9 - IE9:
1st Problem: In my website this browser introduce a horizontal scrollbar when the slideshow start
2nd Problem: it does not support "Endless auto scrolling" feature and it is not possible to go back in the slideshow (if it is at image 4 and I click on thumbnail 3 it does not work..if I click number 5 the link works).

Using firefox and chrome everything is ok.
Any idea to solve it?

The site is http://fondazionegabriellaferriccioni.it/

Thanks,
 Carlo

_____

Probably solved, it was due to the jquery version. I was using 1.4.2 (the same I use for another module) now if I use 1.5.1 the issues seem solved.

_____

Hello,

Use jQuery v. 1.4.4+.

Regards,
ARI Soft
