Problem with the jQuery

Posted by bonheur - 2011/07/11 11:39
_____

Hello,
I just downloaded the ARI Image Slider. When I select 'Yes' to 'include jQuery', I can't change the height and width of the slider and it's very big, and when I select 'No', I can but the images won't load...
I would like to whange the height and width, but don't know how...
Thank you for your help!

Hello,

Probably your images have big width and/or size. You can generate thumbnails and show them in the slider, for this set "Use thumbnails" parameter to "Yes" and define thumbnail width and/or height with help "Thumbnail width" and "Thumbnail height" parameters.

Regards,
ARI Soft
