
Module Position

Posted by francoisp - 2011/07/13 11:23

Hi there I need to move the slider down about 1 /2 breaks. See the screen shot where can i add the into the module code?

Thanks for a great MOD! http://www.ari-soft.com/images/fbfiles/images/ari_slider.jpg

Hello,

Provide link to page where we can see the problem.

Regards,
ARI Soft

Hi there

The only way you will be able to see the site is if you add 196.30.195.182 www.truevine.co.za to your hosts file then it will resolve to our server. Then you will be able to see it. I have also posted that i want to disable the borders on the module as well. No borders at all.

Thanks for the help

Add the next code to "CSS Styles" parameter in module settings:

```
{ $id }_wrapper
{
    margin-top: 8px;
}
```
