JFolder::files: Path is not a folder:

Posted by daverx - 2011/08/15 20:24

_____

Your Image slide show is one of the best, thank you.

I have one serious error on our home page that appeared after installing "mod_ariimageslider". Please look at the top of the home page content, this is where the error appears now.

Willits Rotary Club

I spent all morning trying to find the cause, but no luck.

I googled "JFolder::files: Path is not a folder:" and all I could find was that something was not found?

Thanks for any advice or help you may have to find the cause of the above error.

At the bottom of the home page you will see all is working fine, so one wonders why this error?

Daverx

Joomla - Version 1.5.23
Php5

_____

Hello,

It seems this is a problem with module configuration. Check value of "Image path" parameter.

Regards,
ARI Soft

_____

Hi ARI Soft,

I used the relative path images/slides and this is correct, but the error is still there? Would it help to have access to the Joomla Back-End? If so please send me an e-mail address so I can give it to you. I sure would like to get this great Module working. My Hosting Company is Cirtex VPS - http://www.hostv.com/

Thanks,
Dave

_____

Try now please. Value of "Image path" parameter contained several empty lines.

Regards,
ARI Soft

_____

Hi ARI Soft,

Wow, I'm impressed. That was a fast fix.

I would have never guessed the extra blank lines in the images path text box.

 Thank you very, very much.

Problem solved...

_____

Could you please post the syntax for referencing the image path to the images? in the image path for instance I wrote:
image/stories/slideshow

The images are in slideshow. They display but I get a red error message that says:
"Folder: :files: Path is not a folder. Path: data/18/2/104/56/2593382/user/2844039/htdocs/joomla1"

_____

Hello,

Check that value of "Image path" parameter doesn't contain empty string (unnecessary new line(s)).

Regards,
ARI Soft

_____

thanks for the great help!
I discovered same problem, although I had no glue this error message was due to the blank line after the image path in the ari-slider. However this post solved my problem. An I am very glad, since the slides looks just great. :cheer:
thx - maranius
