## Custom bullets for each slide.

Posted by gustavo.clima - 2011/08/25 14:50

---

hum i know a little of css but i'm trying to customize the nav bullets, it's pretty easy to change all the bullets to look the same, but what if i want to have a custom nav bullet (with a number) for each slide, like:

<http://www.ari-soft.com/images/fbfiles/images/bullets.JPG>

any ideas?

Thanks :side:

Hello,

It requires custom modification. For example you can edit extension's template file:

`\modules\mod_ariimageslider\tmpl\default.php`

and add unique CSS class to each navigation button and use it to specify unique background for specific button.
