Help! Alignment of ari image slider!
Posted by grave - 2011/08/31 03:39
_____

I just finished installed " Ari Image Slider" on my joomla 1.6 website.

I've got big white space between my drop down menu and ari image slider.
How to get this space off? Its so ugly.

And how to move my image slider below on my drop down menu?

See the attachment below: http://www.ari-soft.com/images/fbfiles/images/imageslider-

_____

This problem with incorrect configuration of the module and with site template styles. Set correct size in module settings.
Set "Height" to 288 and "Width" to 1060 and add the next CSS rule:

#header .logoheader
{
 min-height: 0;
}

That's great....thanks...

Now how to center my slide show and how to link each picture?

_____

Sorry, set "Width" parameter to 1026. Use INI file to link images with external pages. Link to sample INI file can be found in "Description" section on module settings page. It also contains instructions how to use INI file.

Regards,
ARI Soft

Okay I'll try....

Anyway I try to browse my website using IE there is still big space between my drop down menu and image slider. Why?

Take a look my website using IE.

_____

Problem with site template styles and selected module position. Add the next CSS rule:

body h1#logo
{
 padding: 35px 0 0 0;
}

Regards,
ARI Soft

Hey I'm done adding the code but the big white space is still there.. :(

I add the code above on CSS Styles on my "Ari Image Slider".

We have checked it in IE 7, 8, 9, FireFox 3 and 4, Google Chrome.

If it is shown incorrectly on your side, try to clean browser's cache. If it doesn't help, you can use "Developer Tools" to investigate page HTML layout and styles. For this press F12 in IE browser.

Hello again..

I am updating my joomla 1.6 to joomla 1.7 after that my image slider is not working anymore...:(

See attachment below: http://www.ari-soft.com/images/fbfiles/images/dropdown-
