
Bottom margin/padding of slider

Posted by lollojoomla - 2011/09/07 10:10

Hi

How can I alter (decrease) the space between the slider box and the rest of the content?

Kindly

Lollo

Hello,

Provide link to a page where we can see the slider. We suppose padding is defined in site template styles.

Regards,
ARI Soft

Padding is defined in site template styles. You can try to use the next CSS rules to remove padding:

```
body #container
{
    padding: 0;
}
```

```
DIV.flexgrid_1
{
    margin: 0;
}
```

or contact site template developers that they remove unnecessary padding.

Works for bottom padding, but moves the whole slider up and to the left. How to just adjust bottom margin/padding?

Re:Bottom margin/padding of slider

This works:

```
body #container
{
  margin-padding: 0;
}
```

```
DIV.flexgrid_1
{
  margin-bottom: 0;
}
```

Excellent slider

Sorry, mean

```
body #container
{
  padding-bottom: 0;
}
```

```
DIV.flexgrid_1
{
  margin-bottom: 0;
}
```
