
Images are not displayed after transfed site

Posted by Anna_F - 2011/09/10 18:39

Hello,
I transfered my site from local computer to the hosting. And then images are not displayed at all but when site was located on my computer ARI Image Slider worked perfect with the same settings.
my site <http://www.photo-fa.nx0.ru/>
How to solve this problem?

Hello,

It seems the module is configured incorrectly. Provide screenshot of module settings page or temporary access to your J! backend by email so we could investigate the issue.

Regards,
ARI Soft
