## Problems with portrait vs. landscape images

Posted by Minnetonka - 2011/09/12 19:16

---

Hi,

I have installed ARI Image Slider and inserted it into an article, but it looks weird, when I use both portrait and landscape rotation of images, as you can see here:

<http://viktor.stawebnice.com/index.php/pripravy>

Here is the screenshot of the module settings:

<http://viktor.stawebnice.com/images/ari.png>

please tell me, what am I doing wrong?

Petra

Hello,

The slider works with images which have the same size.

Ok, but even if I only use the same size portrait-oriented images, it shows the squares on the side and the lightbox size is different from what I set:

<http://viktor.stawebnice.com/index.php/pripravy>

here is the screenshot of the settings:

<http://viktor.stawebnice.com/images/ari.png>

Please advise,

Petra

Great, thanks! there was another folder with thumbnails...  
it would be great if it worked with different sizes of images and was able to crop them...don't you consider implementing it?

We will think about implementation this ability in a future release.
