
center images + other colors on arrows?

Posted by The_Crossroads - 2011/09/18 21:15

Hi there,
Great plug, it works great.

I am trying to center images they are now on the left of the plug.

I tried to search in this topic, with no success.

One other thing is. my site template is white, is there a CSS code to make the left and right arrows darker color - or other color?

please advice,
Thanks a lot.

Hello,

1. It seems you use images with different size (width and height) in the slider. The extension works correctly with images which have the same size.

2. If you use "default" theme, modify the next image file:

/modules/mod_ariimageslider/mod_ariimageslider/js/themes/default/images/arrows.png

If you use "square" theme, modify the following image:

/modules/mod_ariimageslider/mod_ariimageslider/js/themes/square/images/arrows.png

Regards,
ARI Soft

hi there thanks for the response ...

in deed i am using slightly different images BUT the white part in the right is much bigger.. that is why i have asked..how can i center teh images in the middle of the white "frame" .

thanks for the PNG links.. much appreciated.. :).

Mike
