
Weird Border Line

Posted by simmons7 - 2011/09/22 03:42

Hello,

On this page:

reggiesimmons.com/countryside

I am using your ARI Image Slider on the frontpage. I enjoy it very much, however on the second image it is creating a weird line to the right of it that is very annoying. I tried switching out the images but the weird line still appears. Any idea how to fix it or why it is there?

Kind regards,

Reggie

Hello,

The first image (slide1.jpg) has width equals to 921, but other images have with 920. Resize the first image to 920 px.

Regards,
ARI Soft
