
Lots of error with ImageSlider!!! making me go mad

Posted by NGyanGjo - 2011/09/24 15:35

hey! everybody...i got lots of error when i tried to run the image slider module....can't explain it here...you can see the error at <http://phototest.wcityhost.com>

It worked fine in the local server!!
I don't know wats goin wrong!!

-Any help will be appreciated!!

Hello,

It seems this problem with /phototest/images/stories/photo/.let the nature speak1186424155-1024x768.jpg image. Probably it was corrupted.

No, fix the image. Try to open it in an image editor, re-save it and upload to the server.
