
Slider not appearing on Site

Posted by fsi - 2011/09/28 21:01

I'm having a problem with the slider: it is not appearing on the site. Is there something I need to activate or perhaps I have the module in the wrong position? Any help would be much appreciated!

Hello,

Provide a link to a page where you try to use the slider and screenshot(s) of module settings page. You can send it by email.

Check your mail please. It seems you chose incorrect module position.

Regards,
ARI Soft

Thank you, thank you. Such an easy fix, I'm embarrassed. But very thankful to you & your quick response!

The fix? If you can't find the module position you need after clicking the "select position" button in the module manager, just type in the position you need.

In my case, it was "sliderload". http://www.ari-soft.com/images/fbfiles/images/Screen_shot_2011_09_29_at_10.png
