## Image Slider Positioning Problem in IE8

Posted by luca.fabian - 2011/10/04 09:20

---

Hi

Thank you for this great extension. It all works fine except for IE8: when the next image fades in, it moves down by 1px. I was not able to find the mistake in the css..

The site is in offline mode at the moment but I could provide you admin access.

Thanks very much for your help!

Hello,

Send a link to a page where we can see the problem by email please.

Regards,  
ARI Soft

Hello

Thanks for the quick reply.

I sent you the page and login details by email.

---

Try to add the next CSS rule to "CSS Styles" parameter in module settings:

```
#ais_81
{
    height: 246px !important;
}
```

It works!

Thank you very much.
