## I dont see any image

Posted by vano - 2011/10/11 05:53

---

Sorry again but trying and trying, i saves my pics with same size that the module. And keep as .ini file.

I give the direction image path , but i haven see yet any, just the module become black for a milisecond when refresh the page, so were could be the mistake.

What tha mean Descritpion file ---- ariiimage.ini that mean i have to add all this or how ido jus .ini behind the image.

Or probally is another mistake.

Hello,

Provide a link to a page where we can see the problem and provide screenshot(s) of module settings or temporary access to your J! backend by email so we could investigate the issue.

Regards,  
ARI Soft
