
Numbers instead of Bullets

Posted by bora983 - 2011/10/18 10:25

Hi. Thank you very much for making this great module. It is working great on my site. I only have one question. Is there a way to have numbers instead of Bullets for slide navigation.

I need something like this:

1/2/3/4/5

Thanks.

Hello,

It requires custom modification of the extension. For example you can add new theme to \modules\mod_ariimageslider\mod_ariimageslider\js\themes\ folder and modify \modules\mod_ariimageslider\tmpl\default.php template file.

Hi,

I have a similar question. How to put those navigation dots below image? By default dots are above images. Can I do it with default theme?

Thank you.

Hello,

Provide a screenshot where we can see what do you want to achieve.

Regards,
ARI Sot

Use the next CSS rule:

```
.ari-is-theme-default .nivo-controlNavHolder
{
  bottom: auto;
  top: -23px;
}
```

Thank very much, Karma. It worked very well :)

My code is

```
.ari-is-theme-default .nivo-controlNavHolder
{
  position:absolute;
  left:50%;
  width:auto;
  bottom: auto;
  top: -23px;
}
[/code/
```

I found .nivo-controlNavHolder code in style.css and replaced it with the one above
