## Load one image at a time in Slideshow

Posted by jino - 2011/11/21 10:12

---

Hello!

Thank you for such a great mod.

My question is: is there a quick way to make a slideshow load the first image only, then when one of the left or right arrows are clicked load the next?

I ask this because I have a number of slideshows embedded in lightboxes all on the same page and it takes a bit too long to load the page.

many thanks

Jino

Hello,

Sorry, but the extension doesn't support described ability.

Hi, yes I know the module does not support it, I was just asking if there is an easy way to implement it.

It requires custom development. The extension is open source and you can modify it for your needs.
