
youtube parameters not passing?

Posted by chava - 2011/12/01 20:13

Hi, I'm trying to figure out how to pass the youtube parameters like autoplay rel=0 fs=1 etc etc

in the .ini I have:

v2.png="http://www.youtube.com/embed/sVTB3QmvVtE?autoplay=1&fs=1"

however on the live site, its only linking to

<http://www.youtube.com/watch?v=deXFKdfUSil>

how do i fix this?

see: www.geopeakenergy.com/residential (bottom middle images)

Hello,

"ARI Image Slider" doesn't change external links, it can be changed by a 3rd party extension. Do you need any assistance from our side?

Regards,
ARI Soft
