
Image Slider has Black Border at the Bottom

Posted by isarstyle - 2011/12/11 18:48

Hello,

as written in the Topic, on my page the Imageslides has a Black big border at the bottom. First Picture shows as normal second third and first again show the black border.
i think it could be something related to a tooltip that uses the title from img. How can i disable the image title in the image slider?

you can see it on www.isarstyle.com on the first page.

Best regards,

Fred

Hello,

Add the next CSS rule:

```
.ari-image-slider .nivo-caption
{
background-color: transparent !important;
}
```

Regards,
ARI Soft

worked well.
thanks for the fast support.

Best regards
