## Photos Busting out of Webpage

Posted by DEH - 2011/12/22 14:33

---

I'm setting up a photos page on our website with this extension. It is working. However, the photos are busting out of the website. I can't find where the issue is in my settings. Here is the link to the photos page:

[http://sandpondclub.com/joomla/index.php?option=com\\_content&view=article&id=7&Itemid=166](http://sandpondclub.com/joomla/index.php?option=com_content&view=article&id=7&Itemid=166)

Any ideas? Thanks.

Hello,

"Width" and "Height" parameter in module settings have incorrect values. Set it to 1565 and 909

Thanks for the quick reply. I set those parameters in both the Basic options and light box options but the photo is still way wider than the web page.

Width of images which you want to load in the slider are greater than image of free space in selected module position. Resize images or set "Use thumbnails" parameter to use and specify necessary "Thumbnail width" and/or "Thumbnail height". After this set appropriate "Width" and "Height" parameters.

Regards,
