"ARI Image Slider" works in all modern browsers. If something doesn't work on your site, it can be a problem with a 3rd party extension. We can investigate an issue, if you provide a link to a page where we can see a slider.

If you need a help, upload your site to an online server and provide a link to a page where you try to use the extension.

PS: Please post your replies in this topic, don't post each new reply as a new topic.

Sir,
The Error Console shows error on line \$.noConflict(); (myfolder/media/plg_jblibrary/jquery/jquery.noconflict.js).
It tells that \$.noConflict is not a function.How can i correct this error?Please help me sir.....

At least this code should look like:

`jQuery.noConflict()`

instead of:

`$.noConflict()`
