
Pics don't show up

Posted by redarrow75 - 2012/01/08 06:18

Hi guys,
Although I followed the instruction in the manual closely I can not get the pictures to show up on the slider. The module shows itself in the page, but no pictures. Any advice?
Thanks
Dec

Hello,

It seems an incorrect path to images is used. Provide screenshot(s) of module settings page by email so we can investigate an issue.

Ok. I'll do this in the morning. Anyway, should the path be the one from media gallery in joomla backend or a certain folder from hosting server inside website folder?
Than you

It is a relative path from Joomla! root directory. This information can be found in "Description" field on module settings page in "How to use?" section.

Ok,
Here I am again. Please find attached 3 images (screen shots) of the ari image slider settings area. Please take a look and see what I do wrong.
Thanks a lot for your time.

Dec

I looks like the pics weren't attached. I'll try agagin maybe this time will work.

Dec

hopefully this time I managed to upload the screen shots. they are inside an archive called screenshot.zip

Thank you

Didn't work. I'll try again. http://www.ari-soft.com/images/fbfiles/files/screen_shot.zip

Set "Image path" parameter to images/header value.
