Ari Slider slows website down

Posted by pgeerts - 2012/01/19 17:46

_____

Hi,

Recently I added the ari image slider on my website and everything seems to work good. Only the loading time in the begin slows my website down. It takes like 30 seconds to load my website.

I tried to make the images smaller but it have no effect.

Can anyone help me out?

_____

We have checked it in FireFox 9 and the slider loads fast. It can be a problem with your internet connection.

Regards,
ARI Soft

_____

it's not only my problem, also in school they have fast internet for sure!
When I quit the slider, it loads fast.

Thank you for your time anyway!
