
image size setting not working?

Posted by bluefall - 2012/02/03 21:04

Hi,

I'm using the ARI Image Slider module on my website but the image size setting not working. Whatever size I set for the size (Width & Height) in the module, the image always shows its real size.

This problem heppens with IE, Firefox and Opera.

Could you help me?

Thanks!

Hello,

If you want to resize images, set "Use thumbnails" parameter to "Yes" and enter appropriate values in "Thumbnail width" and "Thumbnail height" parameters.

Regards,
ARI Soft
