Hello,

I have a home page with the image module ARI slide. I tested it on all browsers, I had no problem. But my client is on windows with firefox browser, the following appears:

http://inters-interim.be/images/image001.png

Does anyone have an idea of the problem?

Thank you in advance for your answers.

Hello,

Could you provide a link to a page where we can see the slider?

It looks normal on our side. Probably it is a problem with a FireFox addon.
