
Caching Problems

Posted by sveltosss - 2012/02/15 10:54

Hi and Thanks for this wonderful module.

First of all I have caching disabled on my site. I'm running joomla 2.51 with the latest ARI image slider.

I use the slider to read images from a single directory.

That directory has about 11 images which are renewed everyday with exactly the same names.

The problem is that the thumbs are not renewed unless I press refresh on my browser (latest firefox). However, if I click on a thumb the picture that is opened in pop up is the new one!

Is there anything that can be done about this?

Thank you.

Hello,

Download and upgrade the module. It should help.

Regards,
ARI Soft
