Hello,
My images aren't showing up. The path I'm entering in Directories is
../../../../images/stories/front

They are in the folder "Front" in "Stories" in "Images" folder. I have tried each level up to here.
Can you help with the correct path?
Thanks
Paul

Hello,

Provide a link to a page where we can see a slider on your page and screenshot(s) of module settings page.

Hi, you must have accessed it just as I was cleaning up. and left just 1 small image there to see if the size affects the loading. Please check again.

Could you provide a temporary access to your J! backend by email so we can investigate an issue?

_____

The problem occurs due to "System - GCalendar" plugin. Disable it or contact plugin developers so they implement correctly behaviour of "Load jQuery" parameter when it is set to "All".
