
white space

Posted by grave - 2012/05/02 13:27

How to make the image bigger to be fit to the image slider?

Then how to adjust the image slider and the ari ext menu to be align?

See the attachment below: <http://www.ari-soft.com/images/fbfiles/images/gers.JPG>

1. Images width is less than slider width so they are not fit to image slider. Resize your images or change slider width in module settings.

2. Margin between modules are defined in site template styles. Add the next CSS rule to remove margin:

```
#main .grid .module
{
padding: 0;
margin: 0;
}
```

I'm done resizing the image and changing the with slider but still it has a white space.

See the attachment below: <http://www.ari-soft.com/images/fbfiles/images/cut.JPG>

sorry i give you the wrong url.

this is the right url <http://www.livinginthephilippines.com/index/>

thanks

Your images have width = 900, but "Width" is set to 1000 in module settings. Change image width or change value of "Width" parameter in module settings.

hello,

yes, it's done, i already change the "width" module settings.

I still have a problem my ari image slider is not align anymore on the ari ext menu.

See the attachment below: <http://www.ari-soft.com/images/fbfiles/images/align.JPG>

Re:white space

Posted by admin - 2012/05/05 15:12

We can't see the problem because the page requires credentials.

Regards,
ARI Soft

If you want to centered the menu, add the next CSS rules:

```
#main .ux-menu-container
{
    text-align: center;
}
```

```
#main .ux-menu-container .ux-menu
{
    display: inline-block;
}
```

Hello,

Since my ari ext menu showing at the back of my ari image slider on Internet Explorer. I change the module position but still they have white space. I want to move my ari image slider upward.

Kindly browse this site: <http://www.livinginthephilippines.com/index>

and see the attachment below:

Thank you. <http://www.ari-soft.com/images/fbfiles/images/slider-47dd8b3849f76832486b9d3707792930.JPG>

Padding is defined in site template styles. You can try to use the next CSS rule:

```
body #navcontainer
{
  height: 30px;
  background-image: none;
}
```

If it doesn't help, contact developers of the site template.

Regards,
ARI Soft
