
slider does not work

Posted by marionchat - 2012/05/18 09:18

hi,
i have install the slider on my local host, i can see the images, but the jquery doesn't work, i don't have css and i don't have slid.

Can you help please?

Hello,

Upload your site to an online server so we can investigate an issue.

Regards,
ARI Soft

ok it works online,
sorry for that but i have a other problem with the slider.
The slider block the menu

the "mD'thodes" menu has sub menu and it can not be seen on the accueil page

you can see it at this adresse:

<http://www.equi-et-autre.org/>

thanks for you help

The menu doesn't contain sub-menus on "accueil" page. You can see it if open HTML source of the page.

Sorry for bothering you for nothing.
your slider works perfectly :)

thanks again
