Z-index / logo problem
Posted by Wied - 2012/05/18 14:48

_____

Hi there and thanks for a great module.

As you can see here http://www.hentmineflasker.dk/index.php?option=com_content&view=article&id=77&Itemid=480

i have a problem with the logo being overlaped by the module.

Can i force the module to stay all the way in the background ?

Thanks alot.

Mikkel

_____

Hello,

Use the next CSS rule:

```
#art-main>.custom
{
 position: relative;
 z-index: 2;
}
```

```
#art-main>.ari-image-slider-wrapper
{
 position: relative;
 z-index: 1;
}
```

Regards,
ARI Soft
