Cannot display slideshow in suitable position

Posted by nguyenhieu008 - 2012/08/15 17:08

_____

Hello,
I'm totally a newbie about Joomla and also ARI Image Slider. I want to make a business website. So I use Virtue Mart 2 and Skylab template from linelab.org. I'm trying to place a slideshow on top of the site, but I can't. I can place the slideshow on many other position in the template, but when I use position 12 or slide position in template for a suitable interface, it doesn't display the slideshow at all. Can anyone help me solve this problem?
Thank you,

_____

Hello,

Provide a link to a page where we can see the problem and enable Preview Module Positions option.

Regards,
ARI Soft

Re:Cannot display slideshow in suitable position

Posted by admin - 2012/08/15 17:32

_____

The page doesn't contain "ARI Image Slider" module. It contains another slider extension. BTW, your site template doesn't support position-12 module position, you can see available module positions by this link.

_____

I have followed the guide from here: http://www.linelab.org/templates-faq/98-display-slideshow.
It says place modute in position 12, so sorry, I don't realy understand what you mean.
The guide suggests phoca gallery nivo slideshow, but I saw that it don't support for Joomla 2.5, so I use ARI Image Slider instead.
Can you explane about this problem a litle bit more?

_____

Now the module are shown (it was the problem with your site template), but some default module styles are overridden by site template styles. We can recommend to contact site template developers so they fix their styles.

_____

Check your mail. We can recommend to contact site template developers because it is problem with code in their template. When a module is assigned to "slide" position, the site template loads own copy of nivo slider jQuery plugin and load a module into "slide" position only if "display_slideshow" site template parameter is set to "Yes".

Regards,
ARI Soft

_____

Thank you for answering. I noticed a double load of slider. I have looked for a way to contact linelab.org but I cannot find a contact email address. It is too bad because I put a lot of time setting up my site and cannot get a way to show my slideshow. It is very disappointing! The display_slideshow parameter is set to "yes" and in either position_12 or slide, the slideshow does not show.

_____

I have a similar problem

when the module is put under any module position, the images appear OVER the articles's text.

http://ponchadoybordado.com/web/index.php?option=com_content&view=article&id=91&Itemid=595

I want it to the article's side, so in theory, position 5 or 7 should work...but they isnt.

Re:Cannot display slideshow in suitable position

Posted by henryhoang - 2014/04/23 07:11

_____

Go to Admin > Extensions > Template Manager > Skylab and set Display Slideshow to Yes

Done!

Re:Cannot display slideshow in suitable position
Posted by admin - 2014/04/23 07:13

_____

"ARI Image Slider" is a module and it is configured on "Extensions -> Module Manager" page. We don't have any relation to skylab template.

Regards,
ARI Soft
