Image Slider not transitioning on Chrome or Safari
Posted by athacker - 2012/08/17 13:39
_____

Hello,

I am having 3 problems with the image slider in Safari and Chrome. The slider is on www.mettel.net

The problems are:
1. No fade transitions
2. Navigation bullets not working
3. Each panel is linking to the same page rather than the correct page

It's working perfectly on IE and FireFox.

Any help is appreciated.

-Anna

Hello,

These problem with scripts which are used by your site template. At first site template loads very old version of jQuery library (1.2.3) in /templates/rhuk_milkyway/js/slideContent.js file. The second problem, the slider which uses /templates/beez_20/javascript/slides.min.jquery.js file generated javascript errors, you can see in browser's error console. Fix these problems and "ARI Image Slider" will work fine.

Regards,
ARI Soft

Hi, thanks for replying. I did what you suggested: updated the jQuery library and removed the javascript errors but there has been no change in those 3 problems in Chrome or Safari. Any ideas?

_____

Add the next code:

jQuery.noConflict();

After the following one:

in index.php file from site template.

_____

To me it does not work in Chrome and Safari

I added code and files, but it does not work

_____

Hello,

Where we can see the problem?

Regards,
ARI Soft
