
Warning: Failed to save the result of the image...

Posted by michealchan - 2012/09/12 12:31

Ive just uploaded my site from a linux server to a windows based one. The image slider seems to work but I get a series of warning appearing above the slider. It looks like 1 warning per slide.

Warning: Failed to save the result of the image operations in

C:\inetpub\vhosts\brighthygiene.co.uk\httpdocs\newsite\modules\mod_ariimageslider\mod_ariimageslider\kernel\Image\Asido\class.image.php on line 283

Anyone got any ideas??

Hello,

Check that /cache folder has writable permissions.

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

Hi

I have exactly the same problem and get this warning too:

Warning: Failed to save the result of the image operations in
C:\Inetpub\vhosts\laptophelp.ir\httpdocs\lh\modules\mod_ariimageslider\mod_ariimageslider\kernel\Image\Asido\class.im
age.php on line 283

how this problem was solved?

Hello,

Probably an image is broken. We can investigate the problem if you provide a link to a page where we can see the problem and a temporary access to your J! backend by email.

Regards,
ARI Soft

Thanks! :)
how did you fix it?

We updated the module and added ability to use Joomla! FTP credentials.

Regards,
ARI Soft
