
ARI image Slider covers submenus

Posted by bderuiter - 2012/10/03 10:16

Hi,

I'm using your fantastic image slider. But in a template i'm currently using the submenus are being covered by it.

Please take a look :

<http://www.hetfeestwinkeltje.nl/index.php/verhuur-feestkleding-beverwijk>

Thanking you in advance.

Hello,

We can't open the page. It requires a password.

Regards,
ARI Soft

You can now login with

user : test
passw : testing

Thx!

Hello,

I love the ARI slider but unfortunately on my demo page the slider covers the menu too.
Could you give me an advise what to add in the css files?

thanks!

Hello,

Add the following CSS rule:

```
#ja-topsl
{
  position: relative;
  z-index: 1;
}
```

Regards,
ARI Soft

THANK YOU so much!!!

It did it.

Best regards

Hey gang,

I am also having this issue. Love the slider but its covering the navigation menus. I tried playing around with some of the elements' z-indexes but couldn't solve it. I added

```
#ja-topsl
{
  position: relative;
  z-index: 1;
}
```

to rokmoomenu.css but that didn't seem to fix it. Any tips?

Posted by admin - 2013/06/18 14:33

Hello,

Add the following CSS rule:

```
#mainbody
{
  z-index: 4;
  position: relative;
}
```

Regards,
ARI Soft

Hello. I have same problem with my menu. It seems to be covered by ARI ImageSlider (Menu item HF Welders). Please help me to fix it.

Website is: <http://highfrequencywelders.net/zematwww2/>

Thank you in advance.

Hello,

It is not "ARI Image Slider" issue. You can temporary disable the module and the problem will appear. It seems this is a problem with site template styles.

I checked that couple times. If this module is off the menu works fine.
In module basic options when I set not to include jQuery (first top option) the problem also disapears.
But then I have only static baner without slides.

The menu can't work properly when several jQuery instances are loaded. You can see javascript error in browser's error console.

Download and upgrade "ARI Image Slider" module, disable jQuery loading in module settings (it will use jQuery which is loaded by site template) and clean browser's cache.
