
SOLVED*ini file: Assigning Classes to descriptions

Posted by Mainstwebguy - 2012/10/26 13:57

Hello,

I'm working with Ari Image Slider and trying to assign a class to a button in the description of an image in the ariimageslider.ini. the ini looks like this:

```
about-helps.jpg="Welcome!
```

```
Help's on the Way is based in Dearborn Heights, MI and helps provides food and clothing to those in need.
```

```
Learn More"
```

when i check how this is rendered in the browser, the class on the button is being "cut short" and it appears like this:

```
Learn More
```

is there a way to force the ini to include more than one class?

thanks!

=====

Hello,

Use the following code:

```
about-helps.jpg="Welcome!
```

```
Help's on the Way is based in Dearborn Heights, MI and helps provides food and clothing to those in need.
```

```
Learn More"
```

Regards,
ARI Soft
