## Additional Logo over ImageSlider

Posted by Navigato - 2012/11/11 19:50

---

Hi,

I want to use the ARI Image Slider for slide header images with beez5 template. I add an additional small logo over the the headerlogo (first screenshot).

After I activate the ARI Image Slider the additional logo is only viewable with the first header logo. If it change (slides) the first time, my additional logo goes in the background and is not visible. Is it possible to add an small logo which is the hole time visible?

Thanks

Regards

Navigato [http://www.ari-soft.com/images/fbfiles/images/Bildschirmfoto\\_a.png](http://www.ari-soft.com/images/fbfiles/images/Bildschirmfoto_a.png)

---

the second image [http://www.ari-soft.com/images/fbfiles/images/Bildschirmfoto\\_b.png](http://www.ari-soft.com/images/fbfiles/images/Bildschirmfoto_b.png)  
the small logo is an additional element

---

We can't investigate the problem by a screenshot or a video. Provide a link to a page where we can see the problem.

---

Add the following CSS rule:

```
#header-image-logo
{
  z-index: 1000;
}
```

You can add it to a site template CSS file or to "CSS Styles" parameter in module settings.

Hi Navigato and Admin,

I try to add logo over ARI Image Slider.  
But I don't know how to add logo.

Can you give a step by step, how to add logo like Navigato's site on ARI Image Slide?  
I'm very interest

---

Thanks

Best Regards,

Yakob

---

Hello,

It requires knowledge of HTML and CSS. It is necessary to use absolute position for element with a logo.

---

Thank You for your responded

Can you give an example, and how to add?  
and what file I can edit?

thank you

Best Regards,

Yakob

Hi

I did what you said before.

But after I edited the script, the front end is :  
<http://www.yakobproject.com/smb>

could you help me please?

thank you

Best Regards,

Yakob

---

on the /modules/mod\_ariimageslider/tmpl/default.php,

I tried to modify just input image logo.

-----

=====

## Re:Additional Logo over ImageSlider

Posted by admin - 2012/12/05 11:35

---

It is incorrect modification. It is necessary to add an element with logo outside the slider and use absolute position for it (see "position: absolute" CSS property).

PS: If you have any problem with it, you can hire us and we will do necessary modification for you.
