Slider shows up but images aren\'t showing

Posted by Paramo - 2012/11/12 22:14

_____

Hello! I have installed ARI Image Slider and the slider is in the page but the images aren't showing. I set the path parameter on images/prueba.

Here's the link and the settings

http://www.lasopadg.com/site/index.php/?option=com_content&view=article&id=89

In the error console shows me warnings about the templates/bluestork/css/template.css file, the system/css/modal.css and the system/js/mootools-core.js but I dont't know how to fix them. I am using my own template.

Thanks for your support!

_____

Hello,

The page doesn't contain "ARI Image Slider" module.

Regards,
ARI Soft

Oh Sorry, i turned it off because it didn't work. Please take a look again to this link, i really need to use this module and i don't know what happens.

Thank you again!

_____

It seems /images/prueba/ folder doesn't exist on your server. You can see it if try to open this link into a browser. 404 HTTP error occurs.

Regards,
ARI Soft

Ohh great! It works perfectly now! I mistook the site images folder with my template images folder! Problem solved! Thank you for your support!
