
TypeError: \$(\$("#ais_88").nivoSlider is not a functi

Posted by boucdur - 2012/11/22 10:36

Hello,

It seems I have a compatibility issue with ariimageslider and an other script.
I looked on different forums and apprently it comes from nivoslider.

at this adress

<http://support.dev7studios.com/discussions/nivo-slider/1045-slidernivoslider-is-not-a-function>

they explained I m supposed to change the nivoslider call to something more appropriate such as :

```
jQuery(window).load(function() {  
jQuery('#slider').nivoSlider({
```

The thing is how do i achieve that ?

thank you for your help

Hello,

"ARI Image Slider" uses jQuery in safe way. If you have a problem on your site, it can be a problem with a 3rd party extension. We can investigate the problem if you provide a link to a page where we can see it.

Regards,
ARI Soft
