
Thumbs instead of buttons

Posted by rdrewniak - 2012/12/03 17:02

Is it at all possible to use the thumbnails generated as the navigation buttons, instead of having them appear on mouse over (ie. having them appear by default without the buttons)?

Hello,

It requires modification of the module.

That should go without saying. However, as the developer of the component, could you possibly be a little more specific? As in, which file do you create the thumbnails/buttons in?

Thumbnails are generated in
\modules\mod_ariimageslider\mod_ariimageslider\kernel\ImageSlider\class.ImageSlider.php. HTML code is generated in
\modules\mod_ariimageslider\tmpl\default.php file.
