
Thumbnails Path don't Work

Posted by francesco.susin@gmail.com - 2013/01/18 07:29

Hi,
I can not load the images in Thumbnails Path.

I put in
images/piolo/progetti/2003/ex_monastero
the original images (800x600 pixel) that will be displayed in the lightbox (Core Joomla! Lightbox)

and in

images/piolo/progetti/2003/ex_monastero/thumb/{\$fileName}

I put the thumbnails images (640x250 pixel)

but Ari Slider Images shows the images in the main path (images/piolo/progetti/2003/ex_monastero)

Where am I wrong?

See also capture page.

Thankz a lot.

Franz http://www.ari-soft.com/images/fbfiles/images/ari_slider_images.jpg

Hello,

Set "Thumbnail path" parameter to thumb/{\$fileName} value.

Regards,
ARI Soft

Sorry I did not understand.

I tried to replace

images/piolo/progetti/2003/ex_monastero/thumb/{\$fileName}

with

images/piolo/progetti/2003/ex_monastero/thumb/{2003_ex_monastero_001.jpg, 2003_ex_monastero_002.jpg, 2003_ex_monastero_003.jpg}

but not work.
Thanks a lot.

Franz.

Any idea?

Thanks.
Franz.

Read our previous post. Use thumb/{\$fileName} for "Thumbnail path" parameter.

PS: If you have any problem with it, you can provide a link to a page where we can see slider and a temporary access to your J! backend by email and we will help to configure the module.

Regards,
ARI Soft

Sorry.

Now I entered the correct path and works fine!
Excellent!!!

Before I added the path to 'image path'

As soon as I completed the work I'll show you.
Thanks a lot.

Franz.

Hello,
we have the same Problem)-:

Can you help us please?

Hello,

Send a link to a page where we can see the slider and screenshot(s) of module settings page by email.

Regards,
ARI Soft

Thumbnails should have the same name as original images. If original image is 01.png, a thumbnail should have 01.png name too (not 11.png or other).

Hi,

we have just discussed another issue where we would really appreciate your help.

What we additionally want is the following:

After the thumbs and the pictures in the lightbox have been separated from each other by different directories we would also like to differ between these two directories and the thumbnail directory that is used to show up the tumbs while mouse over the dots at the bottom of the slider.

The effect we want is as follows:

Thumbnail slider: For e.g. just 3 pictures (in one separate dir) are passing thru

BUT:

For e.g. 20 dots are shown below including a mouse over thumbnail functionality " these thumbs match with the set of pics that are shown after the lightbox has opened.

Is that possible? And if yes, how do we do it ?

Thank you!

The module shows navigation buttons only for images which are shown in the slider.
