
Change size of text in images

Posted by akroll - 2013/02/08 13:03

Hello. I want to change the size of the text shown over the images, because for my page is a little small.

Also I would like to change the size of the place where the text is shown too.

Can you show me how to do it?

Many thanks for your great work.

Jose.

Hello,

Add the following CSS rule:

```
DIV.ari-image-slider DIV.nivo-caption-content
{
  font-size: 20px;
}
```

Regards,
ARI Soft
