## Link images in self window

Posted by akroll - 2013/02/08 13:40

---

Hello again.

Im writing links for each image. It works, but the link is opened in a new window with shadowbox.

I want that the link runs like an internal link and open the new page in the same window.

I attach a screenshot of what happens now.

The links are written like this:

Laminas-solares-trans-1.jpg="http://www.a-kroll.com/jupgrade/index.php/climatizacion-de-piscinas/energia-solar"

Many thanks [http://www.ari-soft.com/images/fbfiles/images/capture\\_akroll.jpg](http://www.ari-soft.com/images/fbfiles/images/capture_akroll.jpg)

Hello,

Provide a link to a page where we can see the problem and screenshot(s) of module settings page by email.

Regards,  
ARI Soft

Many thanks. The problem is solved and now the links are opened where I want.

Good Work.
