
Linking issue. For home page of my website :/

Posted by stringinga - 2013/02/13 05:12

hey there

the links were workign great one day.. and now they are not.. I am not sure what I did! hoping its somehting simple that I am missing.

The issue lies on the main page of our website:

thesurfersview.com

Please let me know what I can do to fix! I'd really appreciate it.

Thanks.

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?
