ARI Images Slider has stopped working [SOLVED]

Posted by Giankomat - 2013/02/19 12:50

_____

HI all!
A few weeks ARI images slider no longer works. I can not explain why. Maybe because I changed something on my site that I should not? Or does not work because of some module that I updated? I have the same problem with two other slides in the main page. Have any of you had the same my problem? Please help me to run yet ARI images slider.. I love it! Thank you. :(

_____

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

It seems this problem with "com_glossary" extension. It generates javascript error (you can see it in browser's error console) and it prevents execution of other javascript code including "ARI Image Slider" javascript code.
