
Leave Original size of images

Posted by ZAJDAN - 2013/02/20 21:00

Hello...

I have a problem:

when I change size of container "height, width" in Basic Options, so it change size of images also. I want to change only size of the "container" and leave the original size of images. It is possible?

Thank You

Hello,

Could you explain what sense to change size of container and don't change image size?

Regards,

ARI Soft

the reasons are several...

for example I have a images(transparent.png) what contains graphical text and when the image is bigger than original the text is not sharp...ok...i can make size of container same as size of image but in this case is not free space around image and color of background is ended around border of image and it is not nice

next what I want to ask is - In basic Option when I use theme=img the arrows are not displayed, but there is text (prev, next)...is possible show in this theme arrows for navigation?

The module doesn't support this ability. It fits images to container size.

You can modify the extension and wrap slider container with another container and use it for your needs.
