
Module mod_aricloudcarousel Custom Thumbnails

Posted by Orlando - 2013/02/24 13:30

Hi there, I've been trying to get a custom thumbnail to show/link/ on my page, before i come to you I look every possible way i could think and nothing is working on my end (the path to thumbnail)
the plug in is absolutely gorgeous , thumbs up to the whole team at ARI Soft. Can you please check for more info the following links, to my request..

thanks in advance

Hello,

Set "Thumbnails path" to the following value:

../thumb/{fileName}

Regards,
