Unwanted lines in slider

Posted by gaatec - 2013/03/04 13:44

_____

Hi there,
I use ARI slider 2.0.7 with Joomla 2.5.9

First problem:
First image looks fine except from leaving a black line to the left of this probably around 5 px. I however managed to get rid of that black line by choosing the theme "img".

Second Problem:
The next problem however shows up when the first transition comes in with image slightly smaller than original, and then at the expanding the image to the correct size leaving a line at the top of the slide. (See attached image).

The url to the live slideshow is: http://www.collinsstairs.com/

Some further details:

All images are 283x422px.

I have tried a number of different configuration options without success, and have currently reverted to the default configuration with the following changes:
- Set Theme to "img"
- Removed navigation arrows
- Removed slides navigation
- set my current image path

Any ideas?

BTW. Thanks a lot for a great Joomla extension. http://www.ari-soft.com/images/fbfiles/images/2013_03_04_134117.jpg

_____

Hello,

This problem with site template styles. Add the following CSS rule to fix the problem:

.art-article .ari-image-slider img
{
 margin: 0;
 border-width: 0;
}

Regards,
ARI Soft

_____

Excellent!!

That for sure sorted my problem.
Thanks a lot for the incredible fast response.
